

WE ARE AN AWARD WINNING
**ESIGNATURE,
DIGITAL SIGNATURE
AND DIGITAL
TRANSACTION
MANAGEMENT
COMPANY**

COMPANY FACT SHEET - 2020

**WORKS WITH
GOVERNMENT APPROVED
DIGITAL SIGNATURES**

HIGHLIGHTS

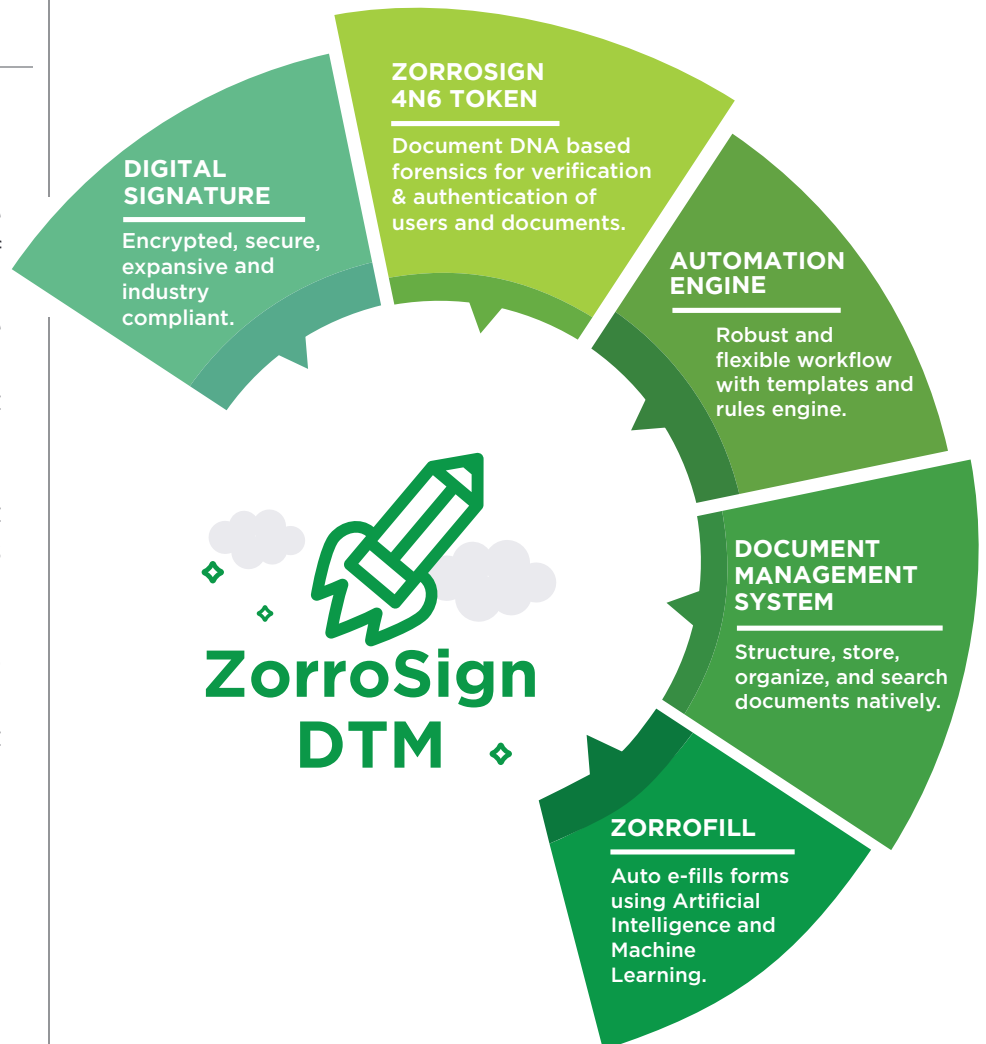

1. Real (patented) Electronic Signature technology vs just an image of signature super-imposed on a document which only captures the "intent to sign." With ZorroSign users 'actually' sign the document electronically.
2. Digital Security Certificates that never expire, therefore documents signed never expire.
3. Using blockchain tokenization technology, tamper-seal your documents, track chain of custody and audit trail; and use it to authenticate and verify documents without needing third party help.
4. Workflow automation, templates, approvals, workflows, Bulk-send, document management system, and intelligent forms.

ZorroSign, Inc. is the pioneer of real electronic signature and the developer of the ZorroSign Digital Transaction Management (DTM) platform using its proprietary blockchain and (patent-pending) document security verification and authentication technology using blockchain.

With ZorroSign users can capture signatures and approvals on agreements from multiple parties using automated workflows, track chain of custody and audit trail, and secure documents using proprietary tamper seal.

ZorroSign believes that 'Trust' is everything and our solution is built from the ground up to protect user identity and privacy, their electronic signatures, and documents and forms against fraud and tampering.

CUSTOMERS

ZorroSign offers its Electronic Signature and Digital Transaction Management Platform to Professionals, SMB, and large corporations. ZorroSign DTM customers are in Financial Services, Real Estate, Government, Non-Profit, Insurance, Health & Life Sciences, Architecture and Design, and Legal.

Organizations use ZorroSign DTM in their legal, HR, Sales, and Procurement departments.

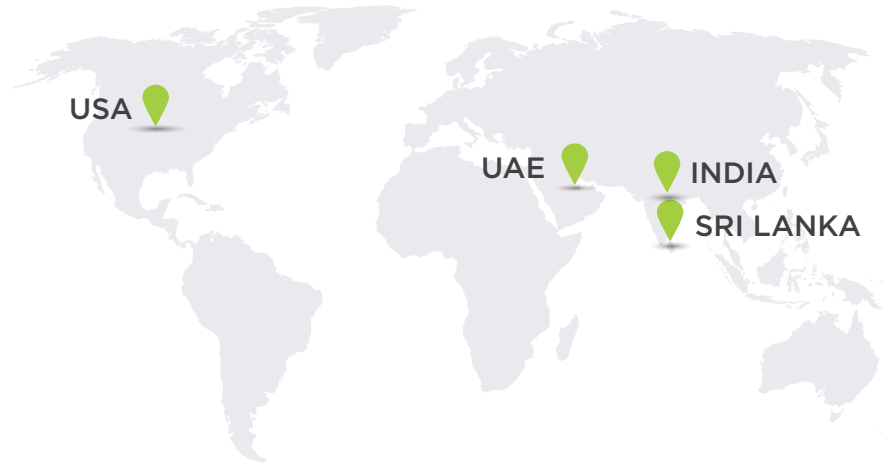

PARTNERS
